

Uolo Weekly Error Trend (PT-BR)

Week Ending 01/20/2023

Based on our random audits, we have identified the following error trends. The purpose of releasing this is to provide some examples that most raters are missing for a certain week and how to approach it moving forward. If you have received a quality notice for the week, we hope that these examples will help you improve in your primary area of misunderstanding.

Final evaluations inconsistent with the evidence

What is an Inconsistent Final Evaluation?

<p>Based on the evidence you found, is the central claim:</p> <table><tr><td>Fully supported</td><td>1</td></tr><tr><td>Partly supported</td><td>2</td></tr><tr><td>Not supported</td><td>3</td></tr></table>	Fully supported	1	Partly supported	2	Not supported	3	<p>Based on the evidence you found... Delete</p> <p>Not supported</p> <p>Based on the same evidence, is the “not supported” claim also:</p> <table><tr><td>Fully contradicted</td></tr><tr><td>Partly contradicted</td></tr><tr><td>Not contradicted</td></tr></table>	Fully contradicted	Partly contradicted	Not contradicted
Fully supported	1									
Partly supported	2									
Not supported	3									
Fully contradicted										
Partly contradicted										
Not contradicted										

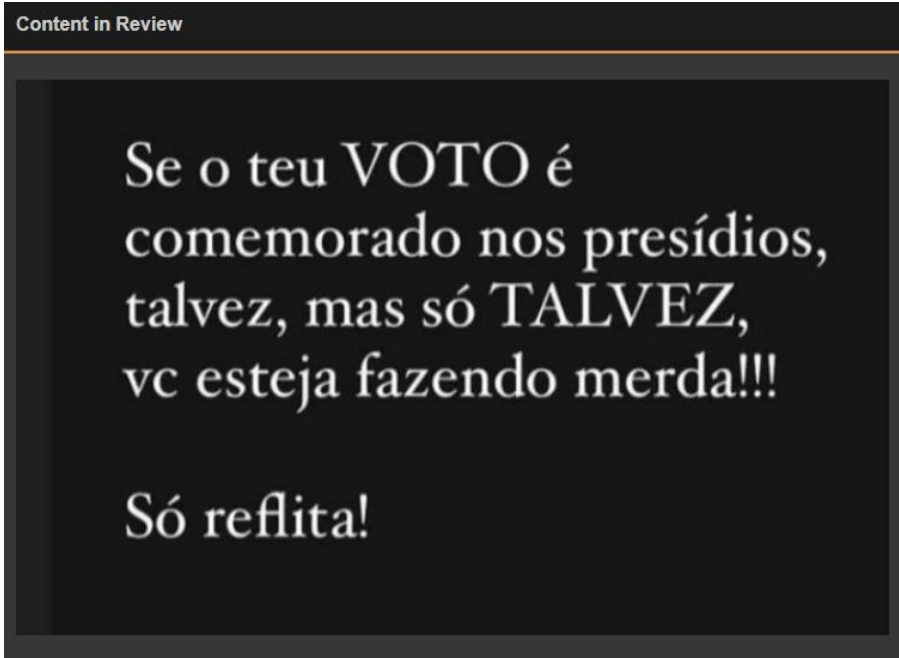

This specific error is where the job has been labelled as Fully Supported, but the evidence is demonstrating that the claim should be labelled Not Supported, Fully Contradicted, or Partly Supported, Partly Contradicted. It is important to understand that your central claim must relate to the evidence you are providing, and that the final evaluation is an evaluation of how this evidence reflects and relates to the main purpose of the post, and thus your written central claim.

Missing Misinformation

- There are many factors that can make a job tricky and cause us to miss contradicted claims and given providing data for misinformation posted on social media is probably the most important objective of our tasks, we must complete each step appropriately to avoid the mistake.

- So many errors on this project can be traced back to the first steps of rating, identifying the complete and appropriate central claim (if there is one). Your central claim helps you build your key words for your search (or indicates to you that you need to search for an image, etc.). Your keywords facilitate a successful evidence search. Finally, your successful evidence search informs your final evaluation. If any step along the process breaks down or is done inappropriately, it can and will affect your final evaluation
- Very rarely does someone identify the correct central claim, find good evidence, and then miss the final evaluation. Missed misinformation is usually caused by improper claims (or missing the claim altogether so you never researched it), improper keyword searching for your evidence, or an otherwise poor choice of source evidence.
- Often, it is helpful to frame your keywords to be highly relevant but in an opposite direction of the post claim. For example, searching for the claim 'Vatican City is the first to pay Russia in rubles for oil' produced evidence that repeats what the post said. Searching in a neutral manner produced a variety of unbiased results.
- Or it can also be helpful at times to include the term "fact check" in your keywords.

Top 1 Error: *Inconsistent Final Evaluation – missing the misinformation contained within a post*

Common Rating	Fully Supported
Misunderstanding	Fully Contradicted
More Accurate Rating	

Potential Evidence Source for Final Evaluation:

https://www.em.com.br/app/noticia/internacional/factcheck/2022/10/05/interna_internacional.1403006/video-de-presos-comemorando-nao-tem-relacao-com-votos-para-lula.shtml

Potential Central Claim: “Prisoners celebrated Lula's election”

Practicable Approach to Post

Tips/Reasoning and Things to Watch out for:

- The main purpose of the content is to ‘inform’ the reader that after the presidential voter counting, inmates celebrated that Lula won the election;
- In this example, the difficulty may have involved inadequate keyword used for finding suitable evidence;

- Often, it is helpful to frame your keywords to be highly relevant but in an opposite direction of the post claim. Searching in a neutral manner produces a variety of unbiased results;
- Looking for evidence, you will find that fact check agencies debunked any celebration in favor of Lula that involves inmates.
- **Acceptable Final Evaluation:** Based on the available evidence, the claim is **Fully Contradicted**.

Top 2 Error: *Inconsistent Final Evaluation – missing the misinformation contained within a post (potentially missed because of an inappropriately formed claim)*

Screenshot	<div data-bbox="678 814 1247 1680"> <p>Content in Review</p> <p>Alan Turing suicidou-se em 7 de junho de 1954, poucos dias antes de seu aniversário de 42 anos, ele mordeu uma maçã envenenada com cianeto. O motivo foi porque o governo britânico o castrou quimicamente, como forma de punição por ele se declarar homossexual, o que era considerado crime na Inglaterra antiga. Alguns dizem que o logotipo da marca Apple é uma maçã mordida em homenagem a ele. Considerado o pai da computação e da informática ele decifrou o código (Enigma) uma máquina nazista alemã que era usada para comandos secretos durante a segunda guerra mundial e como consequência salvou milhões de vidas.</p> <p>Nota: para quem se interessar em saber mais, tem um filme que fala da vida dele "O Jogo da Imitação"</p>  </div>
Common Rating Misunderstanding	Fully Supported
More Accurate Rating	Fully Contradicted

Potential Evidence Source for Final

Evaluation: <https://macmagazine.com.br/post/2022/02/27/de-isaac-newton-ate-a-maca-mordida-a-historia-do-logo-da-apple/>

Potential Central Claim: “Apple created its logo to pay homage to Alan Turing”

Practicable Approach to Post

Tips/Reasoning and Things to Watch out for:

- Always consider the main purpose of the post and keep in mind the objective of our work, to evaluate the claim that gives an answer of supported, partially supported, or not supported to the claim that relates to the main purpose;
- In the example above, the post seems to have the purpose to share some facts about Alan Turing, but the addition of his picture aside the Apple logo has the intention of give more emphasis to the Apple's logo creation and its correlation with the scientist;
- Looking for evidence, you'll find that the creator denies this theory.
- **Acceptable Final Evaluation:** Based on the evidence above, the most appropriate final evaluation is **Fully Contradicted**.

Thank you for taking the time to go over these examples. It is our hope this clarifies the concept for you, and you can use the information to boost your quality moving forward. Please let us know if you have further questions. We are always happy to help.
